

GOUGUENHEIM

HIGH ALTITUDE WINES

FAMILY ESTATE

GOUGUENHEIM FAMILY

Born in Argentina to French parents, Patricio Gouguenheim's love for wine started at the age of 7, when his father began to let him taste some at mealtimes mixed with sparkling water. No doubt this was a catalyst for him entering the world of wine later on life.

But it wasn't until 2002 when he found his dream winery in Tupungato, an old property with great views of the Andes mountains, a really unique soil and irrigation system.

In the inside, a lot of small concrete tanks, perfect for making high-quality, site-focused wines. It was the perfect location, so Patricio decided to abandon a successful career in finance to become a wine producer and start with his family winery. *'I never regret, even for a minute, what we've done. I wanted a change in my quality of life and to create a family business. To produce something which I am proud of. That is why we use our name in our wines. I have my sons working by my side and my grandchildren are already enjoying the winery.'*

GOUGUENHEIM ESTATE

SMALL PRODUCTION WINES FROM HIGH ALTITUDE VINEYARDS

THE TERROIR

The vineyards are cultivated at 1,200 meters above sea level, one of the highest elevations in mendoza. A desert region, where water from the snow of the andes mountains is carried by irrigation channels, through the alluvial soils to the vineyards.

CLIMATE

Valle de Uco has a desert climate, with a vast thermal amplitude between day and night. Dry soils, cool nights and lots of sun exposure during the day. This allows a perfect fruit ripening providing intense aromas, deep colors, remarkable flavors and textures in our wines.

All these elements come together with the expertise and knowledge of our people to define our wines, and consistently produce top quality wines year after year.

GOUGUENHEIM VINES AT SUNSET. VALLE DE UCO, TUPUNGATO, MENDOZA

WHERE WE ARE

Cerro Tupungato
6,570 m.a.s.l.

ANDES MOUNTAINS

Aconcagua
6,962 m.a.s.l.

UCO VALLEY
1,200 m.a.s.l.

City of Mendoza
746 m.a.s.l.

WINERY PRODUCTION AND DISTRIBUTION

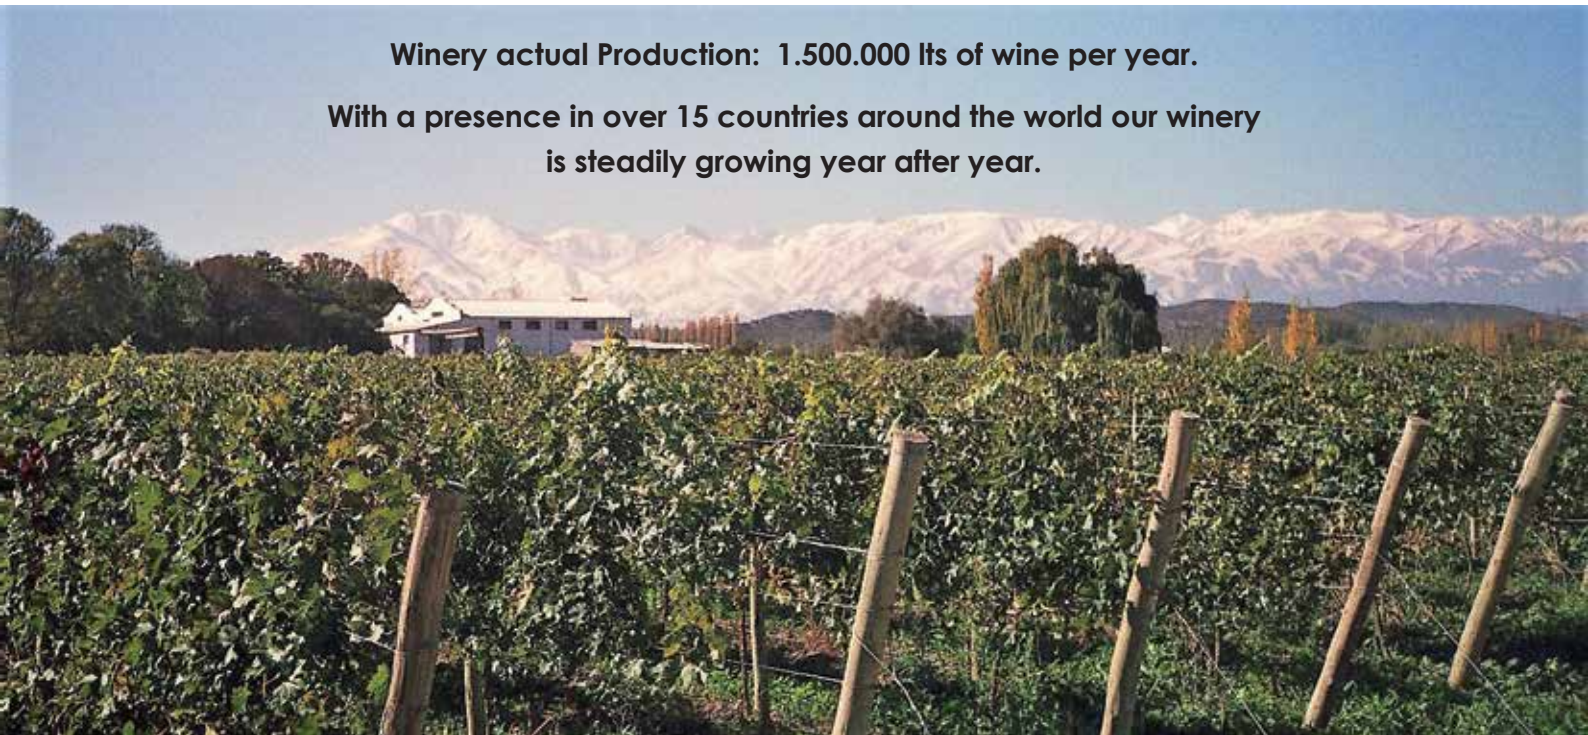

All our grapes are sourced entirely from Uco Valley, from our 45 hectare vineyard and from a small quantity of top producers around our estate. There exists a great difference of quality between grapes from high altitude vineyards and those from other regions of Mendoza. This results in top quality wines, even in our entry level line.

SUSTAINABLE VINEYARDS

We are committed to leave a better world to our next generation. That is why we work together with our winemakers, agronomists and producers to make a good impact in the land during our practise. We promote nutrient cycling, soil regeneration and the no use of pesticides and herbicides, 0% of humidity and low temperatures help us fulfill this efficiently. We use natural irrigation with water entirely sourced from melted snow from the Andes Mountains making our vineyards almost self-sufficient.

Winery actual Production: 1.500.000 lts of wine per year.

With a presence in over 15 countries around the world our winery is steadily growing year after year.

OUR WINES

ESTACIONES

Young wines with a slight step in French oak barrels.

Wines with great personality and varietal typicity.
